Aanleiding PHAMOUS

Nature Reviews | Drug Discovery

Metabool risico antipsychotica

Table 1. Relative Effect of SGAs on Metabolic Disturbances

Generic (Trade Name)	Weight Gain	Dyslipidemia	T2DM
Olanzapine (Zyprexa)	High	High	High
Clozapine (Clozaril)	High	High	High
Risperidone (Risperdal)	Moderate	Low to moderate	Low
Ziprasidone (Geodon)	Low	Low	Low
Quetiapine (Seroquel)	Moderate	Moderate	Low to moderate
Aripiprazole (Abilify)	Low	Low	Low
Paliperidone (Invega) ^a	Low	Low	Low
Asenapine (Saphris) ^a	Low to moderate	Low	Unknown
Iloperidone (Fanapt) ^a	Low to moderate	Low	Unknown

^a Due to the limited trial data for these agents, their metabolic-effect profiles are based on the package insert. SGA: second-generation antipsychotic; T2DM: type 2 diabetes mellitus. Source: References 1, 6.

Doeleinden ROM-PHAMOUS

- **Clïënt:**
 - Sinds 2006 jaarlijkse screening om effecten langdurig antipsychotica-gebruik te monitoren
 - In kaart brengen van mentale, fysieke en sociale gesteldheid
 - Cliënttevredenheid en herstel
- **Behandelaar:**
 - Update voor behandelplan
- **Optimaliseren zorgverlening**
 - verplichting t.o.v. zorgverzekeraar
- **Wetenschappelijk onderzoek**

Totaal 30 wetenschappelijke publicaties sinds 2008

The collage features several scientific publications and journal covers. At the top left is a 'Biological Psychiatry Archival Report' cover. Below it is a PLOS ONE article titled 'Neurobiological Divergence of Negative Schizophrenia Subtypes and New Factor Structure of Psychosis'. To the right is a cover of 'Progress in Neuropsychopharmacology & Biological Psychiatry' with the title 'Care needs and care consumption in psychosis: A natural analysis of guideline'. Below that is a 'Psychiatry Research' journal cover with the title 'Personality traits and clinical outcomes in recent-onset psychosis: symptom severity and social functioning'. To the right of this is another 'Psychiatry Research' cover with the title 'Altered emotional experiences attributed to antipsychotic medications - A potential link with estimated dopamine D₂ receptor occupancy'. At the bottom left is a PHAMOUS Investigators article titled 'Psychotic disorders - A short report of a large naturalistic psychosis cohort'. To the right is a 'Chiatric research' journal cover with the title 'Psychotic disorders - A short report of a large naturalistic psychosis cohort'. The collage also includes various logos like Elsevier, ScienceDirect, and CrossMark, along with author names and affiliations.

Biological Psychiatry Archival Report

Progress in Neuropsychopharmacology & Biological Psychiatry 86 (2018) 89-94

Contents lists available at ScienceDirect

Neurobiological Divergence of Negative Schizophrenia Subtypes and New Factor Structure of Psychosis

Care needs and care consumption in psychosis: A natural analysis of guideline

Personality traits and clinical outcomes in recent-onset psychosis: symptom severity and social functioning

Altered emotional experiences attributed to antipsychotic medications - A potential link with estimated dopamine D₂ receptor occupancy

Psychotic disorders - A short report of a large naturalistic psychosis cohort
